
ToDoListHeaderFormat

Posted by tonyg - 2007/01/03 01:34

Hello, I may be in the minority here, but I use the hell of out my ToDo list and I would to suggest the addition of 'ToDoListHeaderFormat' just like the EventListHeaderFormat. Thank you.

The problem is that there must be some criteria how to the tasks are arranged under the headers so it cannot be just some user defined string.
