
Can't import old 0.22.1 Calendar

Posted by mwsmith - 2007/01/03 20:41

After installing the new Rainlendar2 Version 2.0.2 (b32) I was prompted to import my old events. I received the simple error message "Import failed!". Every time I use the Manager to try and import the old Rainlendar INI Formatted file, I get the same message.

Any ideas how I can get my events loaded into this cool new version of Rainlendar?

Are there any errors in the log file?
