## Future days are showed badly in Events

Posted by jpxsat - 2011/07/04 00:02

---

Hi Rainy:

This happens to me since a lot of time and finally decided to fill a bug about it.

In the Events box, most of times the date and the text are one above the other... some other times, text is correctly arranged in two lines... but i couldn't reproduce the right behaviour.

Don't know if it happens only in french :side:

The problem is that the header gets wrapped only after it hits the right side of the window so it gets overlapped with the date. I'll have to chcek if this could be fixed somehow.
