
Feedback Rainlendar 2.9 BETA build 110

Posted by Ticogrande - 2011/07/31 13:53

MacBook Pro 8 GB running Lion 10.7

Some feedback.

The distortion issue seems to be resolved, but I cannot get the calendar to show on all desktops. It shows only one one.

I have selected All desktops, None, and also played around in the Prefs checking Normal and on Desktop... all combos and none will work. The calendar insists on displaying only on the original desktop.

Any ideas?

Tim

Seems that Apple has changed how things work again. The "Assign To All Desktops" setting disappears as soon as the windows are recreated so you would have to constantly toggle it to make it work. I'll see if there is something that can be done about it.
