
Asking about todo list (shadow4 skin)

Posted by ameinn - 2011/08/10 23:27

Ok, this is about todo list. I want to change font format.

The type of font i already can do it which is arial to century gothic.

BUT, the when i want to change from normal to "bold" cannot.

I already edit from element and todo.xml. Is there another file did i need to change?

Some picture would help.

<http://i55.tinypic.com/11bstub.jpg>

The font type change. "bold" not shown.

Please help me.....

tQ.

(sorry for my bad english)

Welcome to the forum, ameinn.

The item's values are case sensitive.

You write weight="bold" or weight="BOLD"? (write it in upper case: BOLD).

from element.xml

from todolist.xml

whats wrong??? :(

Looks like you're right. Changing some values makes no changes.

I think that the values you're seeing in todolist.xml are default values.
Each category has its own values. (e.g. Magenta has magenta color for text)
And some categories have they own font value.

I haven't tested this, but it's likely that you need to change not the events.xml, but elements.xml. There, you'll see lots of tags like (not). Those are the ones you need to edit in order to change the appearance of the items. If they don't already have weight="BOLD" then add that. If you only use color categories in your To Do list, you'll need to do that for all font elements like red, blue, magenta...
