
Category Date

Posted by spimps - 2011/08/19 07:43

Hi,

In relation to

http://www.rainlendar.net/cms/index.php?option=com_kunena&Itemid=42&func=view&catid=7&id=15609&limit=6&limitstart=6#15663

The date preview icon and auto complete works brilliantly, thanks :).

Now I noticed that it will only auto complete with one category, not multiple. I followed your suggestion again by enable multiple categories, but it removes the icon preview.

Would it be too much of a performance hit to have both (icon preview and multiple categories)?

Thanks again and keep up the good work.

- Nick

The edit control or the selection dialog do not support icons so the preview icons cannot be shown in them. So, for now the previews are available only when single category selection is used.
