## Increase width Events and To Do boxes

Posted by Rob1706 - 2011/08/20 03:06

---

Hello,

being a newby here (although 65 years old) I have a question about Rainlendar 2 Free version. I have implemented this program as I like a simple program. Nowadays no longer working meetings or extensive tasks, only few reminders. What I am looking for if there is an option to change the width of the Events and To Do boxes. If subject is too long than 2 lines are used and I would prefer to change that to 1 line for better overview. I also understand maybe not possible in Free version and only available in Pro (paid) version. Thanks for any advice, also if not possible.

Robert

Welcome to the forum, Rob1706.

To change the width of the lists you need to:  
Right click on a window -> Options -> Skins -> Advanced>>>

In the right side you will find a tree list. In the "Windows" section you can find "Shadow4 - Event List" and "Shadow4 - Task List". Click on each one of the and then click on the Options button below. In the upper side, after "global variables" you will find "window's variables". One of them is the width of the window. Increase the value.

Another option is to break the line and add "..." and the end. To do this: right click -> advanced -> search for the "event list" section -> uncheck "show full summary". (idem on task list).

Hi Jorge-Luis,

many thanks for your clear reply. Have adjusted width to 300 and now Events/To Do list are shown exactly like I wanted.

Robert
