## Calendar colors

Posted by bilbo\_b - 2011/08/22 12:41

---

I would like to use Outlook Exchange as my calendar source. There i have more than one calendar folder. Every folder has its own color in Outlook. Is it possible to have the colors in Rainlendar according to the colors in Outlook? Maybe Work = gray, holidays = green and so on...

Yes, but you need to read the folders as separate calendars. You can then use the "Visual category" setting to choose the appearance for all events in that calendar.
