## Hard to find week view?

Posted by malibu - 2011/09/08 11:58

---

Hi there, I just bought Rainlendar mainly for the week view but unless I am doing something wrong, none of the downloadable skins seem to have a week view? For example I downloaded Statica from customize.org and it only has Calendar,clock,event,and todo basically. It got good ratings but isn't it basically incomplete without a week view? I am using the shadow4 week view with it but it leaves something to be desired. I'm trying to look at the preview screens for new skins but none of them show a week view and I don't want to go downloading each one just to find out it doesn't have it. Can anyone make any recommendations? Even a day view would do..

Thanks.

The week view is a quite new feature so it's unlikely that there are many (or any?) 3rd party skins which contain it.
