
Missing \"New Task\" context menu item

Posted by JMJ - 2011/09/09 16:07

When you add a task on any given day, when you right click to add a second task on that day there's no option to be able to do so. One must add the task on a day without a task and change the date.

Keep pressed the shift key when right click or check the option "Always show full menus" in Options -> Advanced -> General.
