## Week view not properly handling 2-day events

Posted by malibu - 2011/09/11 08:48

---

Recently I had an occasion to create an event from 7pm on one day until 7am on the next day. I found that week view only shows an event from 7pm until midnight on the first day and there is no indication of the event from midnight until 7am on the next day.

Can you give some more details how to reproduce this. I tried it and it seems to work fine at least with this kind of event.
