
Blurry Tooltip text

Posted by daman - 2007/01/06 08:11

i think it's again something to do with the cleartype thing.. the text in the tooltip appears quite blurry.. whereas in version 0.22.1 it looks great! o and btw, is the source for 0.22.1 still there? because i was thinking of modding it a bit myself.. is it alright?

Currently it looks like that the cleartype problem cannot be fixed. You can try to use some other font in the tooltips which doesn't blur so much.

The source for 0.22.1 is under GPL and available at <http://ipi.fi/~rainy/legacy.html>
