## Can columns in the task manager be customized?

Posted by markBax - 2011/10/06 19:12

---

I would like to eliminate some columns in the Task Manager window view. I have checked the forum, skins and documentation but can not find anything like this. Is it possible?

Thanks

I think not. But you can try resizing the column to its lower width. Or maybe editing the ini file, where I suppose the values are stored.

Yes, it turns out you are correct. I went into the INI file and set the 'size' to 0 and this made the columns that I did not like effectively invisible without actually deleting so I can easily get them back if I ever want them.

Thanks!
