
Adding images to calendar (Shadow4 Skin)

Posted by crazybee - 2011/10/26 12:51

in a previous shadow4 1.9 skin I did some hacking I did a number of yrs ago I managed to have a monthly calendar with a different image on top of the month wording to make it look like a photography calendar

I've tried a number of times to do it with the new shadow4 skin but without any success.

Can anyone help me in which files to change? I still have the calendar image its just the coding to get it to fix properly that troubling me.

Thanks http://www.rainlendar.net/cms/images/fbfiles/images/SP32_26102011_1339.jpg
