## complete Todos are different from Outlook

Posted by c.change - 2011/11/01 11:04

Thank you a lot for the APP, It changed way of life.

I use it with my outlook 2010 and synced with my nokia mobile phone. The only problem is that if I mark a TO DO as completed by right menu, it results different from outlook. The Rainlendar2 way is just marking as completed, but outlook will move it to today and mark it completed while not changing the due date. You may have a little test.

This little bug seems no harm, but when syncing with my phone via Nokia PC Suit, it will NOT mark it completed....

SO could you please fix that, making it as native outlook way

Thank you a lot~

The repeating tasks are handled almost completely different in Outlook than in Rainlendar so I'm not sure if it's possible to make them work the same way but I'll take a look at this.

It was OK, I changed sync program to Nokia Suite(updated version of Ovi Suite, not the Nokia PC suite ). It handle that problem ok, it will mark them as completed.

SO calm down. Thank you a lot for quick reply, please keep eyes on this little bug, as other people may talk about this~
