
Rainlendar on XUbuntu

Posted by moromain - 2011/11/16 11:08

Hello,

I'm trying to install Rainlendar on Xubuntu 11.10.

I cannot install Rainlendar because of the dependances libcurl3 and tofrodos.

Where can I find them ?

Thanks !

```
sudo apt-get install libcurl3
```

```
sudo apt-get install tofrodos
```

Or use Synaptic (under System menu). Search for libcurl3 and install it, dependancies will be resolved.
