
google sync crash

Posted by Nik_Henri - 2011/11/18 10:18

Hi,
If you tried to sync to your igoogle calendar before the e-mail activation is done, rainlandar crash

info:
windows xp Sp3
Rainlandar Pro version 2.9

thx

I get an error message that the account is not verified but no crash. This could be related to the logging though. I'll change that in the next build which hopefully will fix the problem.
