
Snooze X time before event.

Posted by RUBn? - 2011/12/05 10:12

What I am really missing is a way to snooze until some time before an event itself.

So instead of the snooze options "1 hour, 2 hours, etc.", something like "Snooze until 1 hour before event, 1 day before event, etc.." would be :woohoo: AWESOME :woohoo: !

Good suggestion. I'll have to think about how it could be added to the program.
