## How to adjust height of calendar/to-do window?

Posted by Hawker17 - 2012/01/04 04:00

---

Hello all,

I want to adjust the height of the calendar/to-do window, so you don't have to scroll with the mouse in it.

In previous versions of rainlendar i could easily give in the numbers in options, but i can't find it in the new version.

Anybody ideas? Thanks a lot in advance.

Depends on the skin you are using but try like this:

- Go to Options->Skins
  - Click the "Advanced >>>" button
  - Select the window from the active (right) side
  - Click "Settings..." or double click the item
