## Rainlendar2 Warning: entry '\LastSync\'

Posted by bugreporter - 2012/01/05 05:50

---

I'm getting the following EM on EVERY Rainlendar start. Any idea how to fix it?

Your configuration file (rainlendar2.ini) has probably been corrupted. You can try to recover a previous working copy from one of the Rainlendar's backup files. If that doesn't help resetting the settings should get rid of the error.

Thank you so much for your kind help!

The reset did it! :D Had to re-configue the skin, re-add all calendars, but the message is finally gone!
