
Chromophore 1.1 change width

Posted by Rob1706 - 2012/01/09 00:28

Hi,

being a newbie here I might ask something which already has been answered but try anyway as could not find what I would like to know.

I am using Rainlendar 2 now for some time and have changed skin from Shadow to Savannah and in both skins I could adjust width of Calendar, Events and To-Do list in Themes without any problem.

Just today I installed Rainlendar on laptop of friend and skin he got was Chromophore 1.1. I tried to find a way to adjust width in this skin but no option available.

Does this mean only in Shadow and Savannah width can be changed or do I do something wrong?

Thanks for any help and/or suggestion.

Regards,
Rob

Chromophore doesn't support changing the list width. I can check if it would be possible to modify the skin so that also the width could be changed from the settings.
