## tray icon format

Posted by Denman - 2012/01/11 11:04

---

Currently, the tray icon displays only the day...how do I add the month?

You mean inside the icon? You can define the date format for the icon's tooltip in Options->Advanced->"Tooltip format" but the icon can only show days.

Thank you for the quick reply. Yes, I was referring to the icon, itself, as it appears in the tray. Now I know that it can only show the day vice month and day. Thank you, again.
