
Contextmenu of TODO LIST

Posted by Tobber - 2007/01/07 22:25

I just upgraded from 0.22 and I really miss the contextmenu for the TODO LIST... just doubleclick and and beeing able to delete or cross out the entry.

Please bring it back. It's so much more handy...

Thanks so much and keep up the good work. Really good program. Those shared network calenders are pretty nice :)

I feel like an idiot but suddenly those beloved option are available... don't know what happend... thanks anyway :)

My post can be deleted ;)
