
Todo

Posted by cscyclingteam - 2012/01/18 00:32

I was wondering what I am doing wrong as to not see a certain category. I have my rainlendar synced to my google calendar, on there i have 5 or 6 different categories (for school) for my todo list i would only like to show my "homework" section.

Please help.. <http://www.rainlendar.net/cms/images/fbfiles/images/Capture-28a0a9f9b3f5091a82de072a31d50cf1.JPG>

If you are referring to the categories that you define in Rainlendar you can exclude (or include) them in the skin window's settings. Go to Options->Skins, select the window from the active list and click the settings button. You can use the "included categories" and "excluded categories" to select which categories you want to see (or don't).

I have done that and i do not see why they are not coming up. I simply want my "homework" category to show.

Are you trying to assign categories to tasks that are in your Google task list? That unfortunately does not work because Google tasks don't support categories.

Looked at the images you posted, i think... the "Homework" which you want is not "ToDo"(Google's Task) but "Events"(Google's Schedule), so you should to add it as "Google's Calendar".
