
Meeting planner (timezone converter)

Posted by andu - 2012/01/20 07:23

Hi,

It would be very good when I insert meeting time on what ever timezone then it automatically converts into my timezone time.

for example I live in Denmark and i have meeting with person who lives in Japan. On Japanese time meeting is on Sat 6:30 AM. I insert meeting time 6.30 am and pick city or timezone and then it automatically converts into my timezone. I have so many meeting what are in different timezone. It would be big help, Thank you

Timezone support is planned but I can't say yet when it is going to be implemented.

Okey, plz let me know when you have done it.
from beginning time zone converter would be fine as well.
