## \\"Show days before event\\" per-entry

Posted by capturable - 2012/01/22 02:27

---

Hi,

there is a global option for tasks and events to control how many days of past and future events will be shown.

But there are events which you may want to see sooner, some later... It would be great if there would be a per-event option like "appear in list before event" which would override the global option!

Thanks  
Michael

I have to think about this. I theory it's a good idea but adding new options to the event editor is something I'd like to avoid.

Maybe you could put it together with the alarms as "notification and alarms". All in all the event list and the alarms are about the same thing: "make user aware of".

But I have no idea if you can save such a setting in ics files etc...
