
restore a recurring task

Posted by Jp... - 2012/01/22 03:23

I created a task with the annual recurrence. In the task list window, I set the task as completed in error and this will move to the next sequence end. How do I restore the date completed in error?

tanks.

If you change the due date of the task the completed date will be reset. You need to mark it completed again until you reach the current instance though.
