## Rainlendar on 2nd HDD, lost events...

Posted by bartus1 - 2007/01/08 15:08

---

Hello,

I've installed Rainlendar on different HDD than my XP. I do ghost my main OS HDD often, so I didn't want to loose any of my Rainlendar events and settings.

Problem:

When I restore my main OS partition, all of Rainlendar is ok, BUT all events and to do items are gone.

Are tasks stored on XP drive even though the app. is installed elsewhere?

What can I do to retain my events and to do items?

Thanks,

Bart

The events are stored in your home folder. The FAQ explains more.
