## Feature: Task Alarm Opens File

Posted by Trainingwheels - 2012/01/23 09:51

---

Is it possible to add an option to open a file when an alarmed event is triggered? I receive pdf files which are future tasks. I would love to see Rainlendar with an alarm feature to open a pdf, text, or other document.

Thanks for your consideration.

Rainlendar is terrific. I have tried several other task managers for Windows and have only been satisfied with Rainlendar.

Try to set the pdf file as the alarm. Rainlendar will try to run it if it doesn't recognize it as a sound file. You can also add the pdf as a url in the event editor so you can open it by clicking the globe icon.
