## Automating Rainlendar?

Posted by LarryL - 2012/01/30 05:47

---

How does one set Rainlendar to automatically start?

I am using Mint Linux 9 and running Rainlendar from the command line works great, except if I have to close the terminal.

Thanks!

Larry

Which windowmanager do you use (gnome or kde ...)? When you have KDE or Gnome you create a link from rainlendar2 to the folder: .config/autostart.
