---

I want not to display a new todo task , but the alarm in the task can work, how to do it ?

And what's the use of the "private" option in the todo window?

<http://www.rainlendar.net/cms/images/fbfiles/images/rainlendar-57657e90e59c82af6782025366d5531e.jpg>

Thanks!

a) Set category as "Hide". if after want to modify it, can from "Manager" to access.

b) Help-file wrote: The event can be marked also as private. This doesn't have any functionality in Rainlendar at the moment but it might be useful if you export the events to some other calendar. The same goes with the "Mark time as busy" check box.
