## Daily to-do's messed up

Posted by Onix - 2012/02/01 02:55

---

Hello everyone,

I have been getting a strange response from Rainlendar (using v2.9 - b111) and I don't really know whether this is a bug, or I set something incorrectly (I don't think I did, at least I can't see it).

Here's the problem:

I have set 4 DAILY tasks (did that yesterday - Jan 31), with basically the same settings. Then I added 5 subtasks to one of these tasks. I set all of these 4 tasks and 5 subtasks to "repeat every 1 days".

It all worked great on the yesterday, just as I wanted, but then on the next day (today), only 3 (two without subtasks and the one with subtasks) of the 4 tasks appear and one (without subtasks) does not.

The tasks with subtasks is there, but all the subtasks aren't. The missing tasks and subtasks are also set to daily, but they're not there for today (Feb 1), instead they mysteriously got set for Feb 2 or Feb 4. Really don't know what I'm doing wrong.

Anyway, if anyone can help and advise me, I will be extremely grateful.

=====

Nevermind. Figured out what the problem was.

A very nice program btw, kudoz to the author.
