
No beta check?

Posted by yoodilo - 2012/02/09 12:25

hey there,

is it possible to turn off updatecheck for new beta versions even when using a beta version? OR perhaps only show an update-screen ONCE for a new version and not on every rainlendar restart? its annoying :) thanks!

Yes, it's possible.

Go to advanced options, in the general section, and search for "check for updates" option. You have 3 choices: Off, Normal and Beta.
