## Turn off large calendar window

Posted by jamtur01 - 2012/02/15 14:01

---

Hi

I'd like to run Rainlendar with only the Calendar and Events windows and with the larger calendar window turned off. I've had a poke through the Skins settings but can't work out how to do this? Is it feasible?

Thanks

James

You can hide the additional windows from the Rainlendar's context menu under the Windows submenu.
