
Sync with Iphone?

Posted by groggsman - 2012/02/22 07:22

Hello,

I've got Rainlendar Pro, and have successfully synced google calendar into rainlendar, however, I was wondering if there was a way where it is possible to:

1. Convert Rainlendar into iCal or CSV format (to add to google calendar); or
2. Add rainlendar to an Iphone iCal

Thanks in advance

Welcome to the forum, groggsman.

To convert to iCal or CSV format you need to right click -> manager... -> file -> export -> iCal or CSV.
