
How to select few categories?

Posted by shogel - 2012/03/01 17:06

Before update I could set few categories for one event. It was pretty handy to me. After update Im glad to see the icons of categories, but I can't set two categories for one event. Is it possible in the new version? Hope it is.

To enable the multiple categories selection: right click -> options -> advanced -> general section -> check "Allow multiple categories"

Thank you. It works, but a sugestion - it would be really cool to enable selecting few categories from the graphic mode. The icons are very useful and I hope in the future I ll be able to select few (with ctr for example) . :)
