
Bluetooth sync?

Posted by membersound - 2012/03/02 06:57

Hi,

can I sync Rainlendar with my (older) mobile via bluetooth?

ty

If the calendar in you mobile phone supports iCalendar files you might be able to just copy the file to some folder via bluetooth and set the calendar to use it. But I highly doubt that this is possible (or at least I haven't heard about any phone which would support this).
