## Text issue on context menu (cosmetic/minor)

Posted by sangfroid - 2007/01/09 00:16

---

Create an event with an ampersand like "One & Two"

Tooltip shows correctly

Right click, context menu shows "Edit One Two" without the ampersand. If you click, the edit dialog is displayed as expected.

Windows XP Pro

Ranlendar 2.0.2 (b32)

Yes, the menus change &-char automatically to underline. I'll fix that.
