## font of the default skin

Posted by imonsei - 2007/01/09 03:22

---

Hi. :)

Can i please have the name of the font used in the default skin(shadow4) of rainlendar?

I downloaded the rainmeter application, and I would like the two programs to have a sort of equal looking theme, so I'm writing a few skins for rainmeter :)

Thanks in advance.

Many thanks.

Browsed through my fonts dir today and the closest i have is "TW Cen MT Condensed extra bold"

I'll see if i can find Fusi on the net.

weeeeee skins here I come!!! =>

bah. couldn't find Fusi, but the other font is a close enough match so I'm gonna go ahead with that.
