
Undo option please

Posted by rhino - 2012/04/09 21:35

Hi,
Can you add an 'undo' option to RL please? I find many times choosing a longer snooze than intended, or clicking the dismiss instead of snooze.
Thanks,

=====

Unfortunate that kind of functionality would be extremely difficult to implement afterwards. It would not be sense to add undo just to the alarm and making it possible to undo any action would require total rewrite of Rainlendar's internals.

With alarms you can reset the snooze/dismiss status if you edit the event and make a change to the alarm fields.

Thanks for the response though.
