
Notes

Posted by beatlejus - 2006/10/29 04:47

Hi all out here,

I like Rainlendar a lot, but I am missing a simple note function.

Is there anything on plan actually?

Rgds,
beatlejus

This gets requested quite a lot so I probably have to do something about it. The problem with the notes is that the iCalendar format doesn't support plain text notes so the system needs to be completely separate from the normal calendaring stuff.
