## Remove week numbers

Posted by bhs67 - 2012/04/22 06:06

---

Removing the week numbers along the left side does not work.

I tried Options -> Skins (icon) -> Advanced (button) -> Active skins (list box), Windows, Shadow 4 - Week View -> Settings (button) -> unchecked "Show week numbers" ... no difference.

Appears to be a bug.

What panel do you using ?

Try : Options -> Skins -> Advanced -> Active skins, Windows, -> Settings -> unchecked "Show week numbers".

Why did you start a new thread?

Not sure what panel means. Attached is a screen shot.

This forum did not like the size of the screen shot ... I'll split it. <http://www.rainlendar.net/cms/images/fbfiles/images/1-5305f5404318263e45a9d6c11d5abbad.jpg>

I started a new thread as there were few responses to the first one ... which might indicate I posted on the wrong forum.

Was the jpg lower than 1280x1024 and with a size lower than 300 KB? If not, then the picture will never appear.

As you are saying that the week numbers are "along", then I suppose you're talking about the calendar, and not about the week view, so, do more or less the same as you did but instead do this:

Options -> Skins (icon) -> Advanced (button) -> Active skins (list box), Windows, Shadow4-Calendar -> Settings (button) -> unchecked "Show week numbers"

Unless you give us more info, there's nothing we can do.

The size of the images are 63K and 43K. They are less than 4 inches square. Not sure what is wrong.

As described in an earlier email, I am using Options -> Skins (icon) -> Advanced (button) -> Active skins (list box), Windows, Shadow 4 - Week View -> Settings (button) -> unchecked "Show week numbers".

The key error is the use of "Shadow 4 - Week View" ... instead of "Shadow 4 - Calendar".

It works now. Thanks!
