## Can't turn off tray icon

Posted by SomeOldGuy - 2012/05/28 00:19

---

I just upgraded to 2.9. I now find that I cannot turn off the tray icon. I went into Options, selected Skins, the Tray Icon is on the right side (under Active Skins) but it won't let me move it out of the list. I suspect that I'm doing something wrong but can't figure out what.

Try disabling Options->Advanced->"Show tray icon".
