
Windows Calendar Tasks not displaying on desktop

Posted by bugreporter - 2012/05/29 21:03

Using Windows Calendar (an .ics) I displayed the tasks in the "To Do" dialog box of Rainlendar. Recently upgraded to latest Rainlendar and NOTHING I do will display tasks on my desktop.

Help.

Are tasks just from the ics file not shown or does this apply to all tasks (e.g. if you create a new task to Rainlendar's default calendar is it not visible either)? If it's just the Windows Calendar's ics file can you send me a sample file (you can send it to Rainlendar's support email address)?
