
Transparency

Posted by Rossi68 - 2012/06/01 03:26

Hi there,i'm using rainlendar for years,i love it.
Under Windows 2000 there was no background color
behind the tasks and todo-list.
Now i installed it under Windows 7 and the background is dark grey.
How can i set the background color of the tasks and todo-list transparent again?

Thank you very much for your support!

The grey background is the way that the skin is made.
To remove the background you will need to edit the skin by yourself.

If you want to try, search in the user folder for the file /skins/shadow4.r2skin, open it (is zipped) and edit the
/xml/todolist.xml and /xml/eventlist.xml. Search for items which element values are "bitmap.background.****" are delete
these lines. BUT!!, the titles (TERMINE and AUFGABEN in your case) will be removed also, because the grey
background is attached with the text.

Problem solved, it was indeed another skin...

Anyway thanks for your help!!!!!
