## After restore the backup-zip-file no data

Posted by sesam - 2012/06/08 13:15

---

Hello,

the backup-info in rainlendar-manager was successfull, but when I restore the backup-zip-file all datas are deleted: Events/ToDo-Lists are empty.

Why??

Bests!

W7-32bit  
Rainlendar Lite  
Version 2.9 (b111) 32 bit

Welcome to the forum, sesam.

Is there any info in the log file?

The log file seems right. Is this from normal working?

After backup or restore, do you see any "ERROR:" line in the log file?  
Has the backup file all the files zipped and with the original data?

View your log, I think you are using the absolute path to specify Default.ics position (C:\Users\Admin\.rainlendar2\Default.ics), and you run backup under user/Admin login, but run restore under user/tester login that without permission to access user/Admin.

Added:

Please check "C:\Users\tester\.rainlendar2\Default.ics",  
if it is not empty, everything is normal (except for path), you only need to modify the file path:  
Options... >> Calendars >> Default >> modify "Filename" as "Default.ics" (without absolute path).

## Re: After restore the backup-zip-file no data

Posted by sesam - 2012/06/10 03:58

That was the solution. THX!!

Bests from Germany!

I should advise you tool below

zip recovery restores zip files in such cases as - file cannot open, invalid or corrupt archive, crc errors and etc

=====
