## problems after version 2.10 BETA build 114

Posted by lazarus - 2012/06/12 06:34

---

Hi,

i'm having problems showing events created with outlook. Currently i'm using outlook 2010 x86 version and MS Exchange 2010. And i notice that the events do not appear in your great application. This is after version 2.10 BETA build 114. I have attached an example of the configuration of the event in outlook. Thanks for the efforts!

The event doesn't show on every 4th year which would suggest that this is related to the leap years. I did some changes to the way the yearly recurring events are stored which probably broke something. I'll try to fix it.

The problem isn't essentially the leap years, but the start-end time. For All Day events it still working right.

Hi,  
build 119 resolved my issue. Thanks again for your great work!
