
Exporting to CSV file

Posted by rpgbutcher - 2012/06/12 13:55

I have exported the events to a csv file but noticed that if there are recurrences created the final date is not included in the file.

ie.
Repeat 1 day a week for 10 weeks only the first 9 dates appear
Repeat weekly until specific date - the last specific date is not included in the file

I am using the latest beta free version

If someone else has reported this I apologise in advance

Welcome to the forum, rpgbutcher.

I tried what you say and it works right.
Could you be more specific about the event?
(start and end date, exceptions, start and end export dates...)

I am using Rainlendar Pro (beta) version 2.10 build 117

I decided to delete the offending entries which had been created last year and recreated them and it has now worked.
Should have done that in the first place. Sorry about that.
Now going to close this post :S
