
Categories with Google Tasks

Posted by Vir7ue - 2012/06/14 19:11

Hi, I was a long time user of Rainlendar Lite and today I bought the pro version to keep the calendars on my multiple computers in sync via Google Calendar. Everything is working great, except that To Do items seem to lose their categories (the icon disappears) if made on the calendar that syncs with my Google calendar task list. Is there no way to preserve the categories - Rainlendar's bold and clear to read visual styling is the reason why I have stuck with it all these years over Google Calendar's flatness.

What if you (Kimmo) program it so that a tag for the category is placed in the description of the task when syncing with Google Tasks and then parsed back into the category in Rainlendar.

Thanks,

=====

Welcome to the forum, Vir7ue.

If I understand you, the categories from Google Calendar and Rainlendar are not getting along?
At least 4 months ago, Kimmo (aka Rainy) said that it was impossible to assign categories to Google tasks list (http://www.rainlendar.net/cms/index.php?option=com_kunena&Itemid=42&func=view&catid=3&id=16557#16614)
The other way, is to try using the option "visual category" for each calendar (http://www.rainlendar.net/cms/index.php?option=com_kunena&Itemid=42&func=view&catid=3&id=17093#17249)

Thanks for the response. I had a feeling that Google Tasks don't support categories, but I am suggesting that as a temporary solution the category can be placed into a tag in the notes section of the Google Task. Eg curly braces {} indicate a category tag like {Business} and Rainlendar would reinterpret this into actual categories in the client side.

The notes field is used to store the metadata in Remember The Milk so it probably would work with Google Tasks too. I don't like this kind of solutions though so I'm hoping that Google will implement this enhancement for their Tasks API: <http://code.google.com/a/google.com/p/apps-api-issues/issues/detail?id=2562>

The status of that api issue reads "accepted"... so I guess we'll just have to wait patiently for it bear fruit.
