
changing single event in recurring event series

Posted by WillB4ever - 2007/01/12 04:39

Hello. First, I'd like to say that I really love this program. I was using Sunbird (as I wouldn't use Outlook unless my job required it), but found this program to better suite my needs. However, one thing that I noticed was that I can't seem to alter one event in a recurring event series without changing the rest of the series. I'm hoping that I'm mistaking, but if I'm not, it would be nice to see this ability in a future release.

Thanks,

Will

Not a mistake. That is not supported at the moment.
